**Every business is unique – we understand that, we structure offerings that will suit your own individual needs**

# WHO IS DIGINETIX

## Values

- We aim to establish a trusting relationship with our clients and strive to show integrity through honest interactions and respect.
- We highly regard our team members and value their role in which they play to enable us to bring the highest quality offering to the client
- We continuously strive to improve and develop our offerings, therefore our Client's inputs are of great importance.

## Why

- We strongly believe in sharing the user-experience with our clients - from concept to completion.
- We work in partnership with our clients to create intelligent solutions to meet their ever evolving business needs.
- No project or service is too small or too large. Our team is highly flexible to accommodate any need.

## Vision & Mission

- *Vision:* To be the trusted end-to-end technology partner
- *Mission:* Providing cost efficient offerings to enable businesses to prosper.

## Team

### Executive Team

- |                        |                  |
|------------------------|------------------|
| • Business Development | Jarco Deale      |
| • Delivery             | Damian Le Grange |
| • GM & Marketing       | Mercia Deale     |

### Digi Teams

- |                         |   |
|-------------------------|---|
| • Designers & Marketing | Jemile Jordaan; Mercia Deale                |
| • RPA                   | Damian Le Grange; Jaun Jordaan; Nico Swartz |
| • Analyst               | Nico Swartz                                 |
| • UI and UX developer   | PD van Aarde                                |
| • Python/ C/C++         | Marco Rabe                                  |
| • Apex                  | Nico Olivier                                |
| • Linux DBA             | Errol Genis                                 |

# WEB & GRAPHIC DESIGN SOCIAL MEDIA & MARKETING

*Not just design,*  
**We visualize your business**

Affordable marketing, graphic and website design solutions built to suit your budget. We offer a variety of different solutions within this field that can help shape and materialize your business through media to effectively communicate value to your customers and establish brand awareness.

*Any project, any scale*

## Visual Identity

*Anything from Logo's, Business Cards, Email Signatures and more.*

## Websites

*From custom finely crafted creative websites to self managed WordPress sites, we've got you covered.*

*Here are the links so some of the sites we were recently involved with:*

- <https://cracklys.co.za>
- <https://407construction.co.za>
- <https://redarkstudios.co.za>
- <https://oakleather.co.za>
- <http://aicrem.co.za>
- <https://diginetix.co.za>

## Media

*From social media images, marketing posters to simple video animations and YouTube video intros.*

## Image manipulation

*Imperfection removal, product placement on any image or even image restoration.*

## Digital Marketing

*Helping business understand Facebook and Google marketing as well as setting up campaigns for them.*

## Social media platforms

*We can create your platform pages, design banners and custom images used for your posts. We can also manage these pages on your behalf and combine it with your digital marketing campaigns.*

 **Did you know:**

*It takes 5 to 7 impressions for people to remember a brand*

# ROBOTIC PROCESS AUTOMATION

*Don't just get the job done,  
Complete it more efficiently*

RPA delivers direct profitability while improving accuracy across entire business functions. Designed to perform on a vast range of complex, rule-based processes, RPA systems act as virtual assistants to trigger responses and communicate with other systems.

When you weave RPA into your workflows, you aren't cutting out the needed jobs. Rather, you're getting them completed more efficiently.

## **Emulates human action**

*Emulates human execution of the repetitive process using various application and systems. It performs tasks like data entry, copying, and pasting.*

## **Conduct high volume**

*Robotics process automation can easily simulate rekeying of data from one system to another. Operates multiple and complex tasks across multiple systems. This helps to process transactions, manipulate data and send reports*

## **System integration**

*This automation system can transfer data between disparate and legacy systems by connecting them at the user interface level instead of developing new data infrastructure*

## **Report generation**

*Automates the extraction of data to produce accurate, effective and timely reports*

## **Information validation**

*Resolves and cross-verify data between different systems to validate and check information to provide compliance and auditing outputs*

## **Robotics as a Service (RaaS)**

*Diginetix offers you a different way to use RPA, instead of high annual license fees, sign up for RaaS by leasing robotic software and accessing a cloud-based subscription service rather than purchasing the various licenses outright. The headaches of ownership plus handling maintenance issues that may arise, are avoided with RaaS.*

 **Did you know:**

*You can increase your revenue per employee with 26%, when using an RPA solution*

# THERMAL SCREENING

*Fully automated screening system,  
Protect your workforce and customers*

Elevated temperature screening is one technology that should play a key part in return to work strategies and the safe reopening of businesses. This valuable solution uses a thermal and optical camera to analyse body temperature, which is a key indicator of the presence of a potential illness, and discreetly alerts the operator when the set temperature threshold is exceeded by someone screened by the tool.

## Deployment & Accuracy

*Along with remote capabilities, there are several other crucial factors to consider. The solution must be quick and easy to implement, as well as being highly accurate. When paired with a blackbody, the accuracy of temperature screening solutions can be within 0.3 °C.*

## Camera

*The camera used can screen up to eight people at once and 100 people per minute, while judging body temperature in less than half a second - all of which makes it ideal for congested and high traffic areas.*

## System integration

*Looking ahead, adopting a solution with an upgrade path to other enhancements, such a facial recognition, is favourable as they can be used in conjunction with future and existing security measures.*

## Safety

*This screening technology allows businesses to take preventative steps to minimise the chances of the wider workforce and customers encountering someone exhibiting symptoms of a potential illness. Several businesses are already deploying this technology, with heat detection cameras at key sites to protect its employees.*

## The economy

*Businesses have plenty on their minds as they prepare for the uncertainty that is sure to continue throughout the rest of the year and beyond. However, due diligence cannot be left to the wayside when looking to adopt an elevated temperature screening solution.*

 **Did you know:**

*You can integrate the thermal screening with your current access control system using facial recognition*

# COVID-19 COMPLIANCE

*Replace paper,  
Go digital*

The return of the workforce and opening the economy during the lockdown period has seen many processes enforced upon businesses to comply with certain criteria Government has put in place in order to collect data, ensure social distancing and overall protect the workforce and customers.

## Digital Menus For Restaurants

*High operational costs involved with disposable menus and constantly sanitizing existing menus can be drastically cut with a digital menu. A very effective QR code is used to scan and access the restaurant's menu on the patron's smartphone. Quick, easy and simple to use.*

*Scan to test*

## Digital Covid-19 logbook

*Replace the endless forms with a digital logbook. This solution can reduce your operational costs and administration time. The data is stored safely for an indefinite period and is easily accessible.*

*Scan to test*

 *Did you know:*

*You can send the QR in advance to your customers, on arrival at your premises submit their temperature reading.*

# CYBER SECURITY

## *Networking Security that works,* **Simplify and streamline protection**

Built from the ground up for zero trust, ColorTokens' cloud-delivered platform offers a new generation of proactive security that simplifies and streamlines protection and compliance for cloud workloads, applications, and endpoints.

### **Security Network**

*The ColorTokens cloud-delivered platform offers a new-generation of proactive security that simplifies and streamlines protection and compliance for cloud workloads, applications, and endpoints.*

### **XProtect**

*Predict Cyber Security Losses - most Executives struggle to effectively identify, communicate and manage Cyber risk. ColorTokens Xquantify enables organizations to:*

- *predict the potential cost of Cyber breaches, with 95% accuracy, for a 12-month period*
- *manage Cyber risk in purely monetary terms just like any other business process - minimising consultant bias*
- *identify where to accept or transfer Cyber risk, and where to invest in security controls for maximum ROI*

### **XView**

*Remove Security Blind Spots - with increasing internal "East West" traffic most organizations have security gaps. ColorTokens Xview enables organizations to:*

- *gain an "enterprise wide" view of the attack surface in one screen - without using multiple security tools*
- *visualise security priorities across - known assets, unknown assets (shadow IT), east west and north south data traffic flows, connections to malicious sites, internal vulnerabilities and misconfigurations*
- *all delivered as SaaS, in minutes, real time, in any environment (on-prem, virtual, cloud, container)*

 **Did you know:**

*ColorTokens were named Next Generation Security Company of the Year at the 2019 Infosec Awards.*

## DATA ANALYTICS

### *Microsoft Power BI,* **Visualize your data**

Build powerful end-to-end business solutions by connecting Power BI across the entire Microsoft Power Platform—and to Office 365, Dynamics 365, Azure, and hundreds of other apps—to drive innovation across your entire organization.

#### **Zero to beautiful**

*Capitalize on improved data visualization:*

- *Streamline reporting with custom dashboards.*
- *Aggregate data to tell a cohesive story.*
- *Analyze data and deliver actionable information.*
- *Use real-time data to improve collaboration.*
- *Connect to your data anywhere.*

#### **Let your data work for you**

- *Bring multiple data sources together in one place, so you can spend time analyzing your data instead of searching for it.*
- *Take back hours in your day with data cleanup, shaping, and modeling features.*
- *Create visualizations and reports that tell a story and reveal insights.*

#### **Modern enterprise business intelligence**

*Simplify big data analysis with intuitive tools that quickly and securely leverage vast quantities of data with real-time accuracy and consistency.*

#### **Big Data Business:**

- *The volume, variety, and velocity of data, making advanced, rapid analysis a priority.*
- *High expectations for capturing new insights and unlocking efficiencies.*
- *The importance of security.*
- *Integration as a major hurdle—especially as data comes in from multiple sources.*

#### **Did you know:**

*Gartner recognizes Microsoft as a Leader for the thirteenth consecutive year in the Gartner 2020 Magic Quadrant for Analytics and Business Intelligence Platforms.*

**Download**

## TRAINING & MATERIAL

*Fit to purpose training solutions for your needs,  
**Retain knowledge***

Capture, retain, and disseminate critical organizational process knowledge to ensure the success of your enterprise systems and processes, accelerate staff adoption, and prepare your organization to be productive and efficient.

### **How well does your training fit your Organization?**

*Organizations are all unique each with areas that need improvement and training.*

*Why is it, then, that organizations buy 'off the shelf' training and are surprised when the training does not achieve the required improvement in performance?*

### **Some important questions**

- *Do you establish what performance improvement is required as a result of your training?*
- *Do you map the business processes and structure training around these?*
- *Do you identify the non-training issues which are affecting performance?*
- *Are the examples used in training relevant to your staff?*
- *Is the terminology used in the training the terminology your staff are required to use in the workplace?*
- *Do the training methods used in the training match your staff's needs?*
  - *Learning styles*
  - *Communication methods*

### **Fit to Purpose Assessments**

*Create Fit to Purpose assessments to test workers against specific criteria and standards of performance.*

 ***Did you know:***

*Staff are trained using real work examples,  
not generic case studies..*

## CONCLUSION

Dignetix is committed to its client's and their individual business needs.

We strive to continually improve and innovate through our dealings with clients and team members.

All our business dealings and projects can be done remotely.

Please do not hesitate to contact us for more information.

We thank you,  
Regards  
Dignetix Team
